I Made This Logo With AI

📍 Tulsa, United States

🌤️ 65°F and Partly Cloudy

—

My brother needed a logo for his contracting business.

They build tiny houses and make sustainable home repairs and improvements.

So I logged into MidJourney and created some branding assets for him.

Had to clean it up with good old photoshop and illustrator

Took about 30 minutes

This is powerful for small biz owners.

The possibilities are endless.
